

STEM Lab LIVE for Kids

*Innovative Hands-On and Project Based Learning
Streamed LIVE to Local Schools and Homes*

EACH LESSON

*Can You Help Us to Provide an Innovative
STEM Curriculum to Local Students?*

Our LIVE Streaming STEM classes are tailored for public schools, church schools & individual students. Since most schools do not have the budget to fund a STEM program, we have created an affordable solution. We provide coding and robotics classes presented by a LIVE STEM teacher, live streamed to any location.

A donation of \$5,000 will allow 20 students to receive a full semester of innovative coding & robotics instruction, while also covering the cost of robot kits, tools and testing equipment.

Please Visit Our Website for class demos and more details
